

Find the gap, name the person

Class-trip dues: my hand-counted total vs the messy JazzCash record, reconciled by my own rules.

8 PEOPLE × 500 · TARGET 4,000 · 8 PAYMENTS · AI TOOL: CLAUDE · NO GUESSING

Rs 4,000

counted total (target)

Rs 3,500

dues accounted for

Rs 500

gap — Usman unpaid

Rs 500

unmatched, in limbo

WHO'S SETTLED

PAID — 7 of 8 (dues fully covered)

Ali ✓

Omar ✓

Sara ✓

Bilal ✓

Hina ✓

Zoya ✓

Ayesha ✓

Ali & Omar both covered by Ali's single Rs 1,000 payment (my rule).

Usman still owes Rs 500

His only payment was Rs 300 "pizza" — a repayment to me, not dues. Ignored per my rule, so his trip dues are unpaid.

0300-unknown — Rs 500, flagged

Blank memo, sender I don't recognize (2025-09-05). Credited to nobody. Don't spend it until I confirm whose it is.

THE LEDGER VS MY COUNT

Counted total (I counted this myself)	4,000
Dues actually accounted for	3,500
Gap (target – accounted)	-500
Unmatched money floating	500
Ignored (Usman "pizza", not dues)	300

The gap (Rs 500) and the unmatched payment (Rs 500) are equal — but I did **not** assume they cancel. If the unknown 500 is Usman, I'm square; if it's someone else, I'm still short *and* holding a stranger's money. Two separate open items.

FOLLOW UP WITH

- Usman — collect his Rs 500 trip dues (the 300 was pizza).
- 0300-unknown — confirm whose payment this is before using it.

Stated my counted total up front, fed the JazzCash record exactly as received, and encoded my own rules: one payment covers two people, a "pizza" repayment isn't dues, and an unrecognized sender is flagged — never guessed. Re-runnable when new payments arrive.
